

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

THIS work is intended to be a concise and complete index of the Session Laws of the State of New York from the session of 1775 down to and including the session of 1896. It contains, in a comparatively brief space and under one alphabet, all matter found in the many and complex indexes, and, besides, shows the present condition, as far as it can be possibly done without direct judicial action, the present status of each enactment. It will be found to be an invaluable aid in investigating any question upon which the legislature has acted. It contains, in methodical arrangement, just what the investigator will have to acquire by long and careful search and labor. Every act, which has been affected in any way by subsequent legislation, is, in its appropriate place, traced down through the different enactments, and every change or modification by amendment or repeal, is noted in the order of its occurrence. Amending and repealing acts will be found under the amended or repealed chapter, unless they in turn become the subject of direct action of legislation. In such case, they occupy a separate paragraph under the same heading.

Under the different Codes, every section which has been subsequently affected by enactment is arranged in consecutive order, and the amending or repealing chapter noted; but sections in which no change has occurred since the enactment of the Code are omitted. Many of the laws, which contain numerous sections, are treated in the same manner.

All legislation relating to cities is placed under the general head of "Cities," with the exception of Albany and New York. To each of these a separate heading has been assigned. The various cities are arranged in alphabetical order, and under each city, all legislation pertaining to it will be found.

In the same manner, all the towns are arranged under the head of "Towns," and the villages, under the head of "Villages."

The legislation relating to the judicial department will be found mainly under the head of "Courts," under which the different courts are arranged alphabetically. The Supreme Court is an exception to this rule, and the matter under head of "Supreme Court" on pp. 733 *et seq.* must be consulted in addition for all legislation on this subject.

Under the head of "Revised Statutes," pp. 677 *et seq.*, the various sections thereof, which have been amended, repealed or otherwise affected by the

Session Laws, are arranged in the order of part, chapter, title, etc., so as to show what changes have been wrought in them by legislation.

The profession will find this work a great convenience in ascertaining the present status of any act of the legislature. If a person desires to investigate the legislation on any subject, he can turn to the proper heading, and there find the different statutes thereon under the appropriate subdivisions arranged alphabetically. For illustration, if he wishes to examine the law concerning "Legislative powers vested in board of supervisors," he will find on page 728 under head of "Supervisors" and its appropriate sub-head, the original act, c. 194, 1849; amended as to Washington County, c. 306, 1868; powers extended by c. 855 of 1869; § 4 of original act amended by c. 361 of 1870; original act amended by c. 597 of 1870; § 1 of original act amended by c. 18 of 1871 and c. 319 of 1872; ¶ 16 of § 4 of original act added by c. 119 of 1873; powers extended by c. 482 of 1875; § 6 of original act amended by c. 264 of 1881; and whole chapter repealed by c. 686 of 1892; and the revision of certain sections in the County Law by c. 686 of 1892.

This, in connection with "General act extending powers and duties of" on page 727, gives the whole history of the law, as affected by legislation, in a "nutshell."

The various abbreviations used in this work will be found in the front of the book, while, at the same time, some of those most frequently employed are shown at the bottom of each page.

Running titles are used at the top of the pages, in order to facilitate the searcher in discovering the heading and subdivision for which he is looking.

The plan of the work requires no further explanation or illustration. It is simple and no difficulty will be experienced in following it.

No trouble, labor, or expense has been spared to render this work simple, complete and indispensable to those consulting the Session Laws; and, while we believe that it is as correct as careful revision can make it, we cannot expect that it is perfect.

The work, as a whole, is respectfully submitted to the public.

WILLIAM H. SILVERNAIL.
